INVESTMENT MANAGER'S STATEMENT - J&E DAVY

Period ended 31 March 2023

Global equity markets rebounded strongly in the fourth quarter of 2022, recovering from earlier losses. The rally was driven by strong gains in developed equities, particularly in October and November, which were fuelled by indications that the Fed may slow down policy tightening as inflation begins to cool off.

The new year started on a positive note, with better than expected economic news. In the US, inflation has been steadily declining despite the job market remaining unusually strong, thanks to the Federal Reserve's aggressive rate hiking. However, there was a brief dip in equity markets in March when three small US banks failed in quick succession, causing depositors to flee. Similarly, Credit Suisse was force sold to its local rival in Europe after a series of missteps led to a deposit flight.

Despite these challenges, central banks held firm in March and hiked interest rates to fight inflation, reaffirming their commitment to safeguarding the banking system. The US Federal Reserve, the ECB, and the Bank of England all raised rates, with expectations for rate cuts being priced in as the Fed raised interest rates by 25bps. Over the previous six months, the Federal Reserve has increased interest rates by 2% to 5%, the Bank of England to 4.25%, and the ECB to 3%.

Equity markets were positive over this period, with MSCI World Index up 6.7%, due largely to reduced fear of recession and headline inflation staring to come under control. Fixed Income markets also were positive for the period, with Amundi Index JP Morgan Global GBI Govies up 1.7%. In March, following the collapse of three banks, interest rate expectations began to come down. Before the collapse, the consensus estimates were for a 50bps rate hike in March, but due to concerns of further damage to the banking sector, the hike ended up being only 25bps. The reduction in rates had a favourable impact on fixed income, as the futures market began to incorporate the expectation of rate cuts before the end of the year.

We will continue to closely monitor global equity markets and adjust our investment strategies as necessary to ensure optimal returns for our clients.

INVESTMENT MANAGER'S REPORTS - J&E DAVY MANAGED FUNDS

For the period ended 31 March 2023

DAVY CAUTIOUS GROWTH FUND

Review of Fund

The Davy Cautious Growth Fund (the "Sub-Fund") is a cautiously managed multi-asset class fund which aims to achieve superior rates of return through investment in active fund managers and through tactical asset allocation.

Performance and Key Highlights

Our portfolio achieved a positive performance during the period, with the Sub-Fund delivering a gain of 4.2%. The fixed income segment contributed significantly to this performance, supported by falling rates. Corporate bonds were a standout performer, with the Vanguard Global Corporate Bond Fund rising by an impressive 4.7%. During this period our fixed income benchmark, Amundi Index JP Morgan Global GBI Govies, returned 1.7%. Our decision to increase duration during this period proved timely as interest began to fall following the brief banking crisis.

Moreover, our liquid absolute return managers provided valuable diversification during a challenging investment environment. AQR and JPM Global Macro both finished strongly with gains of 5.5% and 5.8%, respectively, while Nordea 10, a new addition to the Sub-Fund, also performed well with a gain of 4.9%. This is particularly strong when compared to the HFRI Index, a broad index of hedge funds, which returned 2.0%. However, Ruffer experienced a decline of 2%, due to protective assets offering little help as volatility and credit spreads remained subdued and falling oil prices over the period hindered their commodity exposure. The positive relative performance of our alternative managers reflects the strength of our investment strategy.

Our equity managers with Quality and Growth biases in their portfolios performed remarkably well, with BNY Mellon achieving a significant gain of 13.2% and Blackrock Global Equity delivering a commendable 7.7%. In addition, the USD Hedge strategy outperformed its unhedged counterpart with an impressive margin of 14.0% compared to 6.7%. Although the US Small Caps with pro-cyclical tilts experienced a decline of 2.1%, our overall investment performance remained robust due to the strong performance of our equity managers and the USD Hedge strategy. MSCI World Index over the same period returned just 6.7%.

No SAA changes during this period.

Our equity managers with Quality and Growth biases in their portfolios performed remarkably well, delivering a significant boost to the Sub-Fund's performance during the period. BNY Mellon achieved a notable gain of 13.2%, while Blackrock Global Equity delivered a commendable 7.7%. In addition, the USD Hedge strategy outperformed its unhedged counterpart with an impressive margin of 14.0% compared to 6.7%.

In addition to our equity investments, our portfolio was bolstered by our alternative investments. Our liquid absolute return managers, including AQR and JPM Global Macro, provided valuable diversification during a challenging investment environment. Both managers finished strongly, with gains of 5.5% and 5.8%, respectively. Nordea 10, a new addition to the Sub-Fund, also performed well with a gain of 4.9%. This is particularly strong when compared to the HFRI Index, a broad index of hedge funds, which returned 2.0%. However, Ruffer experienced a decline of 2%, due to protective assets offering little help as volatility and credit spreads remained subdued and falling oil prices over the period hindered their commodity exposure. Specifically, the iShares Europe ex-UK Index Fund rose by an impressive 21.4%, while the Vanguard S&P 500 EUR Hdg gained 13.1%. Our prudent decision to hedge a portion of our USD exposure yielded a remarkable outperformance of 14.0% over its unhedged counterpart, which returned 6.7%.

Moreover, the Sub-Fund's performance was notably boosted by our equity managers' exceptional performance, particularly those with Quality and Growth biases in their portfolios. BNY Mellon delivered a significant gain of 13.2%, while Blackrock Global Equity commendably returned 7.7% against the benchmark iShares MSCI World Quality, which recorded a return of 5.7%. Performance and Key Highlights

Moreover, our liquid absolute return managers provided valuable diversification during a challenging investment environment. AQR Systematic and iShares Gold both finished strongly with gains of 5.5% and 6.5%, respectively, while Nordea 10, a new addition to the Sub-Fund, also performed well with a gain of 4.9%. This is particularly strong when compared to the HFRI Index, a broad index of hedge funds, which returned 2.0%. However, Ruffer experienced a decline of 2%, due to protective assets offering little help as volatility and credit spreads remained subdued and falling oil prices over the period hindered their commodity exposure. The positive relative performance of our alternative managers reflects the strength of our investment strategy.

The fixed income segment contributed significantly to this performance, supported by falling rates. Amundi Global Inflation-Linked Bond Fund rose by an impressive 3.4%. During this period Amundi Index JP Morgan Global GBI Govies returned 1.7%. Our decision to increase duration during this period proved timely as interest began to fall following the brief banking crisis.

INVESTMENT MANAGER'S STATEMENT - IO EO FUND MANAGEMENT (IRELAND) LIMITED

Period ended 31 March 2023

Equity markets made good gains over the past six months, with the MSCI World Index rising by +6.63%. The gains were concentrated in the first two months of 2023 as bond yields fell and technology and internet-related stocks drove indices equity higher. Investors' preference for such stocks was confirmed by poor performance from financial stocks following the collapse of Silicon Valley Bank and Signature Bank in March. As recession fears grew during 2023, cyclical stocks such as resources and industrials underperformed.

In the wider context, euro based investors have experienced no net gains from global equities in the 18 months to end-March.

Bonds traded in a wide range during the six months as investors began to discount a peak in interest rates before unexpectedly strong inflation and labour market data earlier this year caused investors to revise upwards the level at which interest rates will peak in this cycle. The benchmark US 10-year yield was heading back to the highs of this cycle in early March before the turbulence in the US banking sector caused a flight to safety and a rally in bonds into quarter-end despite the immediate response of the Federal reserve and US Treasury to stem contagion.

The euro staged a recovery against the dollar during the six months as investors began to discount the peak in US interest rates. Having started the period at \$0.98, the euro finished at \$1.084, up over 10% but still well below the \$1.235 level of January 2021.

DAVY ESG EQUITY FUND

Review of Fund

The investment objective of the Davy ESG Equity Fund (the "Sub-Fund") is to achieve long-term capital growth by investing, on a global basis, primarily in equities of companies that meet the social, environmental and ethical criteria outlined in the Sub-Fund's Prospectus.

The Sub-Fund intends to achieve its investment objective by primarily investing in companies that make a positive contribution to society, and/or act to safeguard the environment and/or that promote fair trade. The Sub-Fund will seek to reduce risk through geographical and sector diversification. The Sub-Fund will invest up to 20% of its net assets in Emerging Markets.

Performance and Key Highlights

Over the 6-month period, the Sub-Fund returned +9.08%, net of fees, compared to the MSCI World Index return of +6.63%. The relative outperformance of +2.46% was driven by strong stock selection particularly within the Healthcare and Consumer Discretionary sectors. Asset allocation was also positive helped by being underweight the worst performing sector Real Estate and by being overweight the best performing sectors namely Technology, Industrials and Materials. Currency also had a positive impact. The top 3 contributors to return were Oracle, Vinci and Iberdrola.

DAVY DISCOVERY EQUITY FUND

Review of Fund

The aim of the Davy Discovery Equity Fund (the "Sub-Fund") is to provide long term capital growth primarily through investment in equity securities with geographical and sector diversification. The Sub-Fund intends to achieve its investment objective by primarily investing in equity securities issued by small to medium sized companies listed or quoted throughout the world. The Investment Manager will seek to acquire an interest in companies growing their businesses. The Sub-Fund will generally invest in companies with a market capitalisation of greater than €200 million.

Performance and Key Highlights

The Sub-Fund rose by +4.18% from the end of September 2022 to the end of March 2023, rallying broadly in line with global equity markets. Although, smaller companies continued to underperform large during this time, the investment styles of quality and growth rebounded sharply as markets anticipated the interest rate cycle peaking. This had a positive effect on the Sub-Funds overweight allocations to Health Care (Vitrolife AB), Communication Services (Capcom Co Ltd), and Information Technology (Teradyne Inc). As you would expect interest rate sensitive sectors, such as Financials underperformed, especially due to turbulence in the US banking sector (Pinnacle Financial Partners Inc) where your fund has limited exposure. As always, we prefer to invest in attractively valued high-quality stocks with good revenue visibility, on your behalf.

Over the period, markets were volatile, and we added some new positions in high-quality stocks whose valuations had become attractive. Dutch coffee wholesaler and distributor JDE Peet's NV, German online real estate broker Scout24 SE, US lubricants manufacturer WD-40 Co, water desalination specialist Energy Recovery Inc, and shoe manufacturer Crocs. These were funded by the taking profits in stocks which had performed well and selling stocks whose ESG characteristics, valuation or investment case no longer fulfilled our investment process.

DAVY GLOBAL BOND FUND

Review of Fund

The investment objective of the Davy Global Bond Fund (the "Sub-Fund") is to provide investors with income and capital appreciation through a combination of interest income, capital appreciation and currency gains by investing in global fixed income securities.

The Sub-Fund intends to achieve its investment objective by investing primarily in fixed income obligations of both government and non-government issuers in OECD Member States traded on permitted markets as detailed in Appendix II of the Prospectus ("Recognised Exchanges") worldwide.

Performance and Key Highlights

The Sub-Fund returned +2.07%* (net of fees) for the six months to 31 March 2023, compared to +1.72% for its benchmark, the JP Morgan Global Bond Index (euro hedged).

The Sub-Fund's interest rate (duration) and curve positioning was the main reason for the Sub-Fund's outperformance. Positive contributions came from a significant long duration stance in US Treasuries and a couple of tactical short duration positions in Euro Government Bonds in December and January.

In addition, the Sub-Funds overweight corporate and sovereign related credit (spread) positions also aided performance after partially recovering from the H1'22 selloff following the Russian invasion of Ukraine.

* Referencing the 'D' share class, which holds the vast majority of assets.

DAVY STRATEGIC: GLOBAL QUALITY EQUITY FUND

Review of Fund

The investment objective of the Davy Strategic: Global Quality Equity Fund (the "Sub-Fund") is to provide long term capital growth spreading the risk through geographical and sector diversification whilst predominantly taking long only investment positions in mostly UK, European and U.S equity markets with some exposure to Japan, the Far East and emerging markets. The Davy Strategic Global Equity Fund changed its name to Davy Strategic: Global Quality Equity Fund on 10 July 2020.

Performance and Key Highlights

The Sub-Fund rose by 7.67% from the end of September 2022 to the end of March 2023, rallying broadly in line with global equity markets. This represented an outperformance over its benchmark MSCI World by 1.04%. The period was dominated by inflation, peaking global interest rates and banking liquidity. The resultant rebound in the investment styles of quality and growth were also notable, especially in the first quarter of 2023. As a result, the strategy's focus on quality, our house style, led to the maintenance of overweight positioning, versus its benchmark, in Information Technology and Health Care, and underweight positioning in Financials. These were all profitable sector positions to hold. On a regional basis, profits were made in all areas. The largest outperformance over benchmark came from holdings in North America and the UK, while the largest underperformance came from Japan.

Over the period, we added to positions in stocks whose Quality characteristics had improved over the period while conversely trimming positions in stocks whose Quality characteristics had declined. Among other analysis, the strategy seeks to invest in companies with high profitability, low volatility, and sector-leading ESG credentials. Examples during the period include sells of Meta Platforms Inc and Advanced Micro Devices, in favour of Pfizer Inc and Exxon Mobil Corp.

DAVY DEFENSIVE EQUITY INCOME FUND

Review of Fund

The aim of the Davy Defensive Equity Income Fund (the "Sub-Fund") is to achieve stable long-term growth in both capital and income by investing directly and/or indirectly via financial derivative instruments ("FDIs") and exchange-traded funds ("ETFs") in a diversified portfolio of global equity securities.

Performance and Key Highlights

The Sub-Fund returned +3.85% over the 6-month period to end-March 2023 compared with the MSCI World Index return of +6.63%. The relative performance was driven by stock selection, asset allocation and currency. Within stock selection, JPMorgan, Allianz and Hong Kong Exchanges were among the strongest contributors to performance while US Bancorp and Metlife were detractors. Asset allocation was driven by the Industrials overweight and Consumer Discretionary underweight. Currency was a positive contributor to performance. The options strategy contributed negatively to relative performance, driven mainly by put options which expired out of the money as markets rose over the period.

GLOBAL EQUITY INCOME FUND

Review of Fund

The aim of the Davy Global Equity Income Fund (the "Sub-Fund") is to achieve capital appreciation by investing in a portfolio of large capitalisation equities. The Sub-Fund intends to achieve its investment objective by investing primarily in a portfolio of large capitalisation equities. The portfolio as a whole, will have a relatively high dividend yield, thus the Sub-Fund will target a dividend yield in excess of the dividend yield as defined by global developed market indexes (i.e. MSCI World Index, S&P 500 etc.).

Performance and Key Highlights

The Sub-Fund returned +8.10% over the 6-month period to end-March 2023 compared with the MSCI World Index return of +6.63%. The relative performance was driven by stock selection, asset allocation and currency. Within stock selection, JPMorgan, Allianz and Hong Kong Exchanges were among the strongest contributors to performance while US Bancorp and Metlife were detractors. Asset allocation was driven by the Industrials overweight and Consumer Discretionary underweight. Currency was a positive contributor to performance.

DAVY CASH FUND

Review of Fund

The aim of the Davy Cash Fund (the "Sub-Fund") is capital protection and to provide a return in line with money market rates. The Sub-Fund intends to achieve its investment objective by investing in high quality Money Market Instruments, all of which shall be Investment Grade rating and deposits with authorised credit institutions.

Performance and Key Highlights

The Sub-Fund returned +0.08% net over the period, with 3-month Euribor averaging +1.10%. After a period of rapid monetary tightening with some larger than expected interest rate hikes from the ECB, this front-loading of rate rises appears to be slowing. The ECB continue to monitor the impact of monetary policy implementation, with regard to macro impact, as well as both price and financial stability in the Euro area. The yield on the Sub-Fund continues to catch up with the uptick in cash returns, as cash flows and maturities allow, with a drive to build AUM and reduce the Sub-Fund TER. Approximately 20% of the Sub-Fund is maintained in short term weekly liquidity to meet money market regulatory requirements, with investments also blended in deposits termed out for different maturities out to a maximum of one year.

DAVY ESG MULTI-ASSET FUND

Review of Fund

The primary investment objective of the Davy ESG Multi-Asset Fund (the "Sub-Fund") is to achieve long-term capital growth by investing, on a global basis, primarily in equities and fixed income securities that meet the pre-defined social, environmental and ethical criteria as described in the Investment Policies of the Supplement to the Prospectus.

The Davy Asset Management Select Portfolio - Ethical Balanced Growth Fund transferred into the Davy ESG Multi-Asset Fund, a new Sub-Fund of Davy Funds plc, on 13 October 2017 via a scheme of amalgamation.

Performance and Key Highlights

The Sub-Fund gained +3.26% in the 6-month period to end March 2023.

Equities

Over the 6-month period, the Sub-Fund returned +9.08%, net of fees, compared to the MSCI World Index return of +6.63%. The relative outperformance of +2.45% was driven by strong stock selection particularly within the Healthcare and Consumer Discretionary sectors. Asset allocation was also positive helped by being underweight the worst performing sector Real Estate and by being overweight the best performing sectors namely Technology, Industrials and Materials. Currency also had a positive impact. The top 3 contributors to return were Oracle, Vinci and Iberdrola.

Bonds

The bond portfolio fell -2.61% (gross) for the six months to 31 March 2023, compared to -3.48% for its benchmark, the JP Morgan Global Bond Index (unhedged in euros). While underlying bond performance was positive for both the Sub-Fund and benchmark, currency detracted from overall performance.

The bond portfolio's interest rate (duration) and curve positioning was the main reason for its outperformance versus its benchmark. Positive contributions came from a significant long duration stance in US Treasuries and a couple of tactical short duration positions in Euro Government Bonds in December and January.

In addition, its overweight corporate and sovereign related credit (spread) positions also aided performance after partially recovering from the H1'22 selloff following the Russian invasion of Ukraine.

DAVY GLOBAL FOCUS FUND

Review of Fund

The aim of the Davy Global Focus Fund (the "Sub-Fund") is to generate absolute returns over the medium term. Absolute returns are specific consistent positive returns which are not necessarily dependent upon specific asset class exposure or upon continuous rising markets. The Sub-Fund intends to achieve its investment objective by investing in a diversified portfolio which will be represented by the asset classes referred to in the Supplement to the Prospectus in accordance with its investment strategy, with the principal focus being on a long-short global equity strategy.

The Davy Focus Funds plc – Focus Global Fund I transferred into Davy Global Focus Fund, a new Sub-Fund of Davy Funds plc, on 24 November 2017 via a scheme of amalgamation. The name of the Sub-Fund was changed in January 2018 to Davy Global Focus Fund.

Performance and Key Highlights

The Sub-Fund rose by +4.04%, during the 6-month period 30th September 2022 to 31st March 2023. The period was dominated by inflation, peaking global interest rates and banking liquidity. The resultant rebound in the investment styles of quality and growth were also notable, especially in the first quarter of 2023. Macroeconomic uncertainty has meant your Sub-Funds allocation to cash and fixed income has stayed broadly unchanged. Nonetheless, we have increased its duration, taking advantage of better bond valuations. While stock selection was the principle driver of performance, with top performers coming from the Information Technology (NVIDIA Corporation, Taiwan Semiconductor), Industrial (Kuehne+Nagle International AG, Rational AG) and Consumer Discretionary (Garmin Ltd, Tractor Supply Company) sectors.

Over the period, we added to positions in stocks whose Quality characteristics had improved over the period while conversely trimming positions in stocks whose Quality characteristics had declined. Examples of transactions during the period include purchases of CBOE Global Markets Inc, WD-40 Company, which were funded by the sale of Pfizer Inc, Nabtesco Corporation, and Peptidream Inc.

DAVY LOW CARBON EQUITY FUND

Review of Fund

The aim of the Davy Low Carbon Equity Fund (the "Sub-Fund") is to achieve long-term capital growth by investing, on a global basis, primarily in the Equity and/or Equity Related Securities of companies who adhere to environmental, social and governance practices with the view to making positive contribution to society, and/or act to safeguard the environment. The Sub-Fund will seek to reduce risk through geographical and sector diversification.

Performance and Key Highlights

For the 6-month period to end March 2023, the Sub-Fund gained +9.97%, net of fees, compared to the MSCI World Index return of +6.63%. Stock selection was a marginal detractor to performance with positive selection within the Consumer Discretionary sector being more than offset by gains within Materials and Technology. Asset allocation was the primary driver by being overweight the two best performing sectors namely Technology and Industrials and by being underweight the Healthcare and Real Estate sectors. Currency was a positive contributor to performance benefiting from US dollar weakness. The top 3 contributors to return were Oracle, Siemens, and Vestas Wind Systems.

7. Share Capital (continued)

No share capital of the Company has been put under option nor has any share capital been agreed (conditionally or unconditionally) to be put under option. No share class hedging is in operation on any of the Sub Funds.

The aim of the Anti-Dilution Levy is to reduce the impact of Dealing Costs (which, if material, disadvantage existing Shareholders of the relevant Fund) so as to preserve the value of the relevant Fund.

The need to charge a dilution levy will depend on general market liquidity of a Sub-Fund's Financial Instruments and on the net transactional activity of Shares on any given Dealing Day, and this will be evaluated by IQ EQ Fund Management (Ireland) Limited and J&E Davy (the "Investment Managers") without prior notification to the relevant Shareholder. Net transactional activity of Shares is determined with reference to the cumulative subscription and redemption requests (including subscriptions and/or redemptions which would be affected as a result of conversions from one Fund into another Fund) processed in respect of any given Dealing Day.

Anti-dilution levy is applied to the Davy ESG Multi-Asset Fund. The Directors reserve the right to impose an Anti-dilution levy as necessary. The Sub-Funds expect to net subscriptions and redemptions affected on the same date, subject to applicable laws and regulations. However, if on any dealing day, there are net subscriptions or net redemptions, the Sub-Funds may impose an anti-dilution levy on an equitable basis pro rata among investors subscribing or redeeming on such a dealing day to cover the dealing costs (such as commission, stamp duty, local market fees and market impact) associated with converting the net subscription monies into underlying investments of the Sub-Funds or realising the net redemption proceeds from the underlying investments of the Sub-Funds or in transferring securities forming part of an in specie subscription to, or an in specie redemption from, the Sub-Funds. The anti-dilution levy is calculated on the basis of actual dealing costs incurred by the Funds, which is based on amounts and estimates provided by the Investment Adviser. The anti-dilution levy is retained by the Sub-Funds and is intended to protect existing and continuing Unitholders against the dilutive value of their investment as well as preserving the value of the underlying investments of the Sub-Funds.

The movement in the number of redeemable participating shares for the Funds during the period ended 31 March 2023 were as follows:

^{*}These Sub-Funds launched on 04 January 2022.

The realised gain/(loss) from financial instruments at fair value through profit or loss represents the difference between the carrying amount of a financial instrument at the beginning of the reporting period, or transaction price when purchased in the current reporting period and its sale/settlement price.

The unrealised gain/(loss) represents the difference between the carrying amount of a financial instrument at the beginning of the period, or transaction price when purchased in the current reporting period and its carrying amount at the end of the period.

9. Fair Value Measurement

IFRS 13 establishes a fair value hierarchy that priorities the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS (CONTINUED)

For the period ended 31 March 2023

9. Fair Value Measurement (continued)

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are not based on observable market data (that is unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables analyse the Sub-Funds' financial assets and liabilities at fair value through profit and loss as at 31 March 2023 within the fair value hierarchy.
