

BlackRock Emerging Markets Absolute Return Fund

A sub-fund of BlackRock Strategic Funds

Class D2 USD

ISIN: LU0852332542

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to achieve positive absolute returns through a combination of capital growth and income on your investment regardless of market conditions.
- ▶ The Fund seeks to gain at least 70% of its investment exposure to equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, emerging markets. This is achieved by investing at least 70% of its assets in equity securities, other equity-related securities and when determined appropriate fixed income (FI) securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short-term maturities) deposits and cash.
- ▶ The equity-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used to help achieve the Fund's investment objective and the Fund may, via FDIs, generate market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). A significant portion of the Fund's assets may be invested in total return swaps and contracts for difference that aim to achieve a specified return based on underlying assets such as equity and FI securities.
- ▶ At any one time, a substantial amount, or even all of the Fund's assets may be held as cash to provide cover for the exposure created by the use of FDIs or to assist in achieving its investment objective.
- ▶ The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The LIBOR 3 Month Index should be used by shareholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$100,000 or other currency equivalent.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
 - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

***The LIBOR 3 Month Index is changing to 3 Month SOFR Compounded in Arrears + 26.1 basis point spread effective 15th December 2021

The ongoing charges figure is based on expenses for the twelve month period ending 30 June 2021. This figure may vary from year to year. It excludes:

- ▶ Performance fees, where relevant.
- ▶ Portfolio trade-related costs, except costs paid to a custodian and any entry/exit charge paid by the Fund to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
