

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dynamic Multi Asset Growth Fund, a Euro denominated sub fund of the Aberdeen Standard SICAV III, A Acc EUR Shares (ISIN: LU1432322557). This fund is managed by Aberdeen Standard Investments Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims for a long term total return through capital appreciation and income.
It aims to perform in line with the MSCI AC World Net Total Return Index (Daily Hedged to EUR) ('the index') (before charges) over the market cycle (typically 5 years plus) and 2/3 of the index over shorter periods. It also aims to deliver a volatility less than 2/3 of global equities over a full market cycle as measured by two-thirds of the index. Volatility over periods less than 5 years may be higher.

Investment Policy
Portfolio Securities

- The Fund invests in assets including equities, bonds, cash deposits and money-market instruments directly, via other Funds (including those managed by abrdn) and via derivatives, resulting in a diversified portfolio. This combination is expected to reduce the Fund's overall volatility while maintaining the long term return aim.
- The Fund can take long and short positions in markets, securities and groups of securities through derivative contracts.

Management Process

- The Fund is actively managed by our investment team with a wide investment remit and holds a portfolio of assets from both Europe and overseas, selected without reference to index weight or size, combined with strategies based on advanced derivative techniques designed to enhance portfolio diversification and thus lower volatility.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the index over the longer term.
- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Multi-Asset ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

- The Fund will use derivatives extensively to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) and / or to meet its investment objective. Derivatives will be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested or conventional assets alone. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Derivatives and Techniques

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.
The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.
The fund is rated as 4 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory

risks.
All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.
The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.
Inflation reduces the buying power of your investment and income.
The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.
The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.
In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.
Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	1.58%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The ongoing charges figure is at 31/12/2021. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking. A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at www.abrdn.com.

PAST PERFORMANCE

Dynamic Multi Asset Growth Fund, A Acc EUR Shares, 31 December 2021

% Returns

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section. Performance is calculated in EUR. The fund was launched in 2016. The share/unit class was launched in 2016. Performance Target – MSCI AC World Net Total Return (Daily Hedged to EUR). Performance Target 2 – 2/3 MSCI AC World Index Net Total Return (Hedged to EUR).
