## What is this product?

### Type

This is an open ended UCITS fund.

### Term

There is no maturity date of the fund.

### Investment objective

The fund aims to provide an absolute return after fees have been deducted by investing directly, or indirectly through derivatives, in equities of European companies.

Absolute return means the fund seeks to provide a positive return over a period of 12 months in all market conditions, but this cannot be guaranteed and your capital is at risk.

The fund is actively managed and invests at least two-thirds of its assets directly, or indirectly through derivatives, in equities of European companies.

Alpha' funds invest in companies in which the investment manager has a high conviction that the current share price does not reflect the future prospects for that business.

The fund may (exceptionally) hold up to 100% of its assets in cash and money market investments.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus). The fund may use leverage and take short positions.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

**Benchmark:** The fund's performance should be assessed against its objective of providing a positive return over a 12-month period in all market conditions, and compared against the MSCI Europe (Net TR) Index and the Euro Short Term Rate (or an alternative reference rate). The comparator benchmarks are only included for performance comparison purposes and do not determine how the investment manager invests the fund's assets. In relation to the MSCI Europe (Net TR) index, the fund's investment universe is expected to overlap materially, directly or indirectly, with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the MSCI Europe (Net TR) index. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

**Dealing Frequency:** You may redeem your investment upon demand. This fund deals daily.

**Distribution Policy:** This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

**Depositary:** J.P. Morgan SE

### Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

## What are the risks and what could I get in return?

### Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		EUR 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 6940	EUR 7440
	Average return each year	-30.6%	-9.4%
Unfavourable	What you might get back after costs	EUR 8540	EUR 7940
	Average return each year	-14.6%	-7.4%
Moderate	What you might get back after costs	EUR 9630	EUR 9420
	Average return each year	-3.7%	-2.0%
Favourable	What you might get back after costs	EUR 11060	EUR 12100
	Average return each year	10.6%	6.6%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The Unfavourable scenario occurred for an investment between 03 2017 to 03 2020

The Moderate scenario occurred for an investment between 09 2019 to 09 2022

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 06 2013 to 06 2016

## What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 542	EUR 1044
Annual cost impact (*)	5.4%	3.4% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1,2 % before costs and -2,2 % after costs.

## Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	These costs are already included in the price you pay when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge. [3.00%]	Up to EUR 300
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	These costs are an estimate based on actual costs over the last year that we take each year for managing your investments. [1.99%]	EUR 199
<b>Transaction costs</b>	This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. [0.40%]	EUR 40
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	These costs are taken from your investment subject to the "high water mark" principle, 20.00% of the share class outperformance in excess of the Euro Short-Term Rate. See the prospectus for more details. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years. [0.00%]	EUR 0

## How long should I hold it and can I take money out early?

There is no recommended minimum holding period for this fund but investors should not view this as a short term investment. However, you can redeem your investment without penalty at any time in accordance with the fund's prospectus.
